

Zencellose M20K35

Description:	Zencellose M20K35 is a medium-low viscosity, extremely highly modified cellulose ether made for premium tile adhesives, it improves open time, imparts excellent sag resistance and workability, increases water demand as well heat resistance.
--------------	--

Specifications

2% Viscosity (RV@20°C)	18000 ± 3000 cps
Appearance:	Whitish powder
Particle size:	99%
Moisture Content:	Max 8%
Ash Content:	Max 13%

Modification & Applications

Modification Characteristics	Excellent sag resistance Very Long open time Improved Workability Improved water demand and heat resistance
Suggested Applications	Cementitious Tile Adhesives or other mortars requiring heat resistance

Packaging and Storage

Bags	Woven multi-layer bags with Polyethylene lining Net weight: 25KG
Pallets	4 bags per layer, total 12 layers Net weight 1200 KG
Containers	20 ft General Purpose container: 12000 KG, 10 pallets 40 ft General Purpose container: 24000 KG, 20 pallets Other configuration possible upon inquiry
Storage	In unopened bags, this product can last several years. In opened bags, the moisture content of this product will be influenced by air humidity. See MSDS for information on handling, transportation, and storage of the product.
