Advice on protection against fire and explosion : Avoid dust formation. Provide appropriate exhaust ventilation at places where dust is formed. Take precautionary measures against electrostatic discharges. If user operations generate dust, fumes or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame).

Hygiene measures : When using do not eat or drink. When using do not smoke.

Dust explosion class : St1
